

# Assembly Instructions

## LIEGE DESK

1. Carefully open all 3 boxes (PEDESTAL, TOP and BASE). Locate the hardware packet which comes with the PEDESTAL.
2. Remove the table TOP from the packaging and place top side down on a soft surface (carpet, or the box which it came out of)
3. Attach the shorter metal BASE piece to the underside of the TOP, then attach the longer BASE piece to the TOP.
4. Use the small screw to attach the two BASE parts together.
5. Remove the drawers from the PEDESTAL by pushing on the release toward the back of the drawer glides.
6. Attach the PEDESTAL to the TOP from the inside of the PEDESTAL. Take note of the direction of the drawer openings as this determines whether the PEDESTAL will be on the left or right of the desk.
7. Carefully turn the desk right side up and re-install the drawers into the PEDESTAL.
8. Enjoy your new desk!
