

# Assembly Instructions

## HARVEST DROP LEAF TABLE

Turn the table upside down on the floor, being careful not to scratch the top. Place each leg in a corner of the apron with the bolts protruding through the holes in the corner blocks. Place a washer and nut on each bolt and tighten – do not overtighten, just snug and then  $\frac{1}{2}$  turn.

Turn the table rightside up. To operate the drop-leaves, lift the leave and pull out the support bars; they should engage the angled blocks and wedge the leaf into place. To lower them, reverse the process. All four supports should be engaged on each side.
